

Join us for a STAR NET Region II
WEBINAR for FAMILIES

Fears & Phobias: What's Normal? What's Not?

Fears in childhood are the rule, not the exception. Sometimes these fears rise to the level of phobias, where the worries and avoidance actually interfere with the child's functioning.

Join child psychologist, expert Dr. Paul Shawler, for a developmental walkthrough to learn what's typical or "normal" at different stages, how to spot when the fears are becoming excessive, and what to do. We will share supportive and practical strategies.

Monday, April 4, 2022

7:00pm - 8:30pm on Zoom
